(54) BAG-SHAPED CONTAINER WITH BOTTOM

COPYRIGHT: (C)2001,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a bag-shaped container with a bottom, excellent in self-supporting stability and easy to be folded in a flat state.

SOLUTION: A bag-shaped container with a bottom comprises a bag-shaped body member 10 having a lower end opening and a bottom member 20 for closing the lower end opening of the body member 10 by being thermowelded to the body member 10, and both the body member 10 and the bottom member 20 are formed of a synthetic resin sheet having flexibility. A spout 13 having an openable screw cap 13a is mounted on an upper edge of the body member 10. The bottom member 20 comprises a disc-shaped bottom plate 21 whose central portion is swollen downward and an annular circumferential wall 22 suspended from a circumferential edge of the bottom plate 21 and thermowelded to the body member 10. The bottom plate 21 is so designed that it can be held in an upwardly swollen state by pushing up its central portion and inverting it.
